2007 New Product

TRACKER[®] Pro Team 175 TXW - The nation's best-selling bass boat now even bigger and better

The TRACKER[®] Pro Team 175 set the aluminum bass boat market world spinning nearly a quarter-century ago, and has continued to grow in popularity ever since. It's no surprise since it just continues to improve each year.

For 2007, the new TRACKER Pro Team 175 TXW is five inches longer, six inches wider, has even larger casting decks and a brand new interior designed by and for fishermen, than its predecessor.

There's a new switch and instrument panel and a console that can accept an assortment of instruments as well as the standard-equipment, state-of-the-art Lowrance[®] X 37 sonar unit (with surface temperature gauge) to help find the trophies.

A comfortable, full-width bench seat with step to the aft deck gives a comfortable ride to both the pilot and passengers.

The 17' 8" length and the 89-inch beam create spacious wide-open bow and aft casting decks. The wide 60" bottom makes this 175 one stable fishing platform. The all-welded Revolution hull, all-aluminum Power Track set-back transom and the full-length longitudinal stringer system create an ultra-strong and durable boat that will perform perfectly trip after trip after trip. It's carpeted with sun- and stain-resistant fishing friendly marine carpet, but for those who prefer it, there's an uncarpeted version available.

An aerated, divided livewell with timer and pump-out feature can help keep your catch alive, no matter whether it's destined for a tournament weigh-in or the fish-cleaning station back at the dock.

Among the other quality assets are pinchless seat hinges, an expanded cockpit area, lockable bow-deck storage with a dry storage box and cooler. The aft deck includes tackle tray storage with trays, and lockable rod boxes are located on the bow center and port-side, further making the Pro Team 175 TXW the best value in the market. The boat comes “fishing ready” with a bow-mounted MotorGuide® trolling motor and a two-bank, four-amp, on-board battery charger.

It’s a lot of fishing boat for not a lot of money. And no matter which striking color scheme you choose, it rides on a color-matched Trailstar® trailer with its swing tongue and exclusive, GalvaShield™ finish for years of corrosion-resistant service.

For more information on the TRACKER® Pro Team 175 TXW or other Tracker models, contact your nearest TRACKER® dealer or visit the website at www.trackerboats.com. There is a convenient dealer locator on the website.
